14 November 1983

Chief, Classification Review Division Office of Information Services, DDA SUBJECT: Review of OER Publication "International Oil Developments" 1. Attached is the second set of ten issues of "International Oil Developments" (ER IOD 75-12 through 75-21) which is part of the mandatory review request for this publication for the year 1975. CRD performed the initial review of these issues after consultation with several specialists in the DI. But, given the technical nature of the subject and variety of sources used, CRD is coordinating the review with the DI specialists, as we discussed earlier, to ensure that the review is complete and accurate. 2. Attached to each document is a worksheet. Please return the material to us so we can study the results from your coordination and prepare the documents in final form for return to IPD. 3. Our initial plan was to send you a set of ten issues when you returned a set. Per our conversation last week, I am forwarding this second set herewith to keep the project going, although the first set sent to you on 8 September has not yet been returned. We realize the difficulty in getting a project such as this one reviewed, and hope that the arrival of this second set (in a total of ten) will lend some momentum to the review. Please return the signed document receipt for this set.
